

VOUCHER SHEET

Molpadia intermedia

Molpadiida

---

Specimen Code and Date Examined: May 9, 1983

Keys Used: Clark, H.L. 1907. The apodus holothurians. A monograph of the Synaptidae and Molpadiidae. Smithsonian Contributions to Knowledge 35: 1-231.

Important Characters: Spicules from the tip of the tail are small tables with a tall spire. Sometimes the sides of the top of the tables are drawn out into a handle. The figures in H.L. Clark are very misleading and are supposedly from small specimens; I am basing my identification on spicules from syntypes.

Related Species and Character Differences: *Molpadia musculus*. This species has long fusiform rods in the tail.
