Cerebratulus californiensis Coe, 1905  
Lineidae

SCAMIT CODE: LACO 32  
Date Examined: July 9, 1984

Synonymy: None

Literature Cited:
Coe, 1905; Coe, 1940; Bernhardt, 1979 (unpublished); MacEwen (unpublished)

Diagnostic Characters:
Live: 10-15 cm length; 4-5 mm width. Mouth and probosis pore separate. Body rounded in the anterior region, much flattened and with very thin margins in the intestinal region (Fig. 1). Body color greyish, pinkish, yellowish, buff, dark brown, or reddish-brown without distinctive markings. Cephalic furrows moderately long and very deep. Caudal cirrus small but conspicuous. Probosis very long and slender. Ocelli absent. Preserved body shortens and fragments easily.
