

Synonymy: Anemone #92 of Ljubenkov

Literature: Calgren, O. 1949. A survey of the Ptychodactiaria, Corallimorpharia, and Actinaria. Kungl. Svenska Vetenskapskademiens Handlingar Fjarde Serien Band 1 N:01.

Diagnostic Characters:

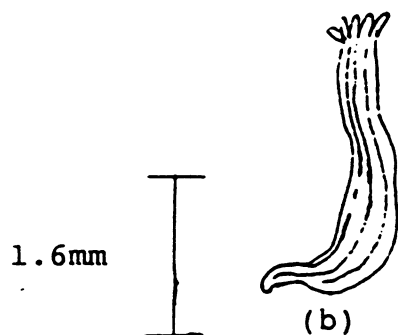

1. Column translucent; no verrucae or other adherent organs; smooth; color (ETOH) light brown to yellowed; to 1.6 cm in length.
2. 5 pairs perfect fertile mesenteries and one pair imperfect and infertile = 6 pairs of mesenteries.
3. 10 short blunt tentacles creased at the base (oral side).
4. Hypostome (mouth) a transverse slit.

Distribution: OCSD 8606 Con I/1; CSA parcel one 2-2/C. Depth 60-100M

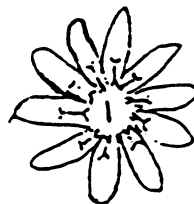

Comments: This appears to be Halcapa decemtentaculata Hand, 1954; but I would like to see larger specimens before making a synonymy.
